Campaign for Merit in Business presented evidence to a House of Commons committee in 2012 of a causal link between increasing female representation on boards and corporate financial DECLINE:

<https://c4mb.wordpress.com/improving-gender-diversity-on-boards-leads-to-a-decline-in-corporate-performance-the-evidence/>

It would make more sense, rationally, to reduce the proportion of women on corporate boards.

Earlier today I posted two comments on the evidence of a causal link between appointing more women to corporate boards, and declines in financial performance:

<https://c4mb.wordpress.com/improving-gender-diversity-on-boards-leads-to-a-decline-in-corporate-performance-the-evidence/>

The two comments have not been published, and I shall post them on the Campaign for Merit in Business website <http://c4mb.wordpress.com>, along with the evidence of them (and this) being posted.

I would expect such crass ideologically-driven censorship from The Guardian, not from The Times, to which I have subscribed for many years. Maybe not for much longer.
